DETAILED ACTION

Claim Objections

1. Claim 33 is objected to because of the following informalities: In line 13, "said first byte code" should be --said first byte codes--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 13-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The examiner could not find the description in the specification for "generated looping instructions" (Claim 13, line 7; claim 14, line 3; claim 18, line 10; and claim 19, line 4). It is not apparent what is meant by the phrase.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 13-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2662

Claim 13, line 7, "said generated looping instructions" lacks a proper antecedent basis with respect to either a 'generating' step or 'looping instructions'. Note: claim 14, line 3, refers to "said generating" step.

Claim 16 improperly depends on claim 15 since it negates the limitation of claim 15. It appears that claim 16 should depend on claim 14. See corresponding apparatus claims 20 and 21.

Claim 18, line 10, "said generated looping instructions" lacks a proper antecedent basis. See above with respect to claim 13. Note: claim 19, line 4, refers to "said generating" step.

Claim 34, line 7, "said executable instructions" lacks a proper antecedent basis. It appears that the phrase should be --said first byte codes--. See corresponding method claim 32, line 7.

Allowable Subject Matter

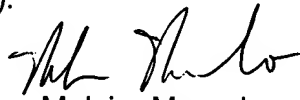

6. Claims 1-12, 23-33 and 35-40 are allowed.
7. Claim 34 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
8. Claims 13-22 are rejected under 112, 1st and 2nd paragraphs, but are allowable over the prior art of record.
